

Detailed Table of Contents

Section A: *General Principles of Vaccinology and Vaccine Practice*

Chapter 1 Introduction to Vaccinology	15
Immunization	15
Live Vaccines	15
Non-live Vaccines	22
Passive Immunization	24
Basic Vaccine Immunology	25
Antibodies	25
The Extrafollicular Reaction	27
The Germinal Center Reaction	29
Cytotoxic T Cells	38
Additional Concepts	41
Correlates of Protection	41
Herd Immunity and Herd Severity	46
Genetics of Vaccine Responses and Adverse Events	49
Vaccines and Public Health	51
Goals of Immunization Programs	51
Public Health Impact of Vaccines	53
Chapter 2 Vaccine Infrastructure in the United States	59
Vaccine Development and Licensure	59
Emergency Preparedness and Response	67
Policy and Recommendations	71
Monitoring Delivery	78
National Immunization Survey (NIS)	81
Behavioral Risk Factor Surveillance System (BRFSS)	82
Other Methods	82
Disease Surveillance	83
The Vaccine Safety Net	84
Vaccine Adverse Event Reporting System (VAERS)	86
Vaccine Safety Datalink (VSD)	87
Postlicensure Rapid Immunization Safety Monitoring (PRISM)	87
Clinical Immunization Safety Assessment (CISA) Network	88
Brighton Collaborations	88
Defense Medical Surveillance System (DMSS)	88
Special Surveillance Efforts	88
Ad-Hoc Committees and Task Forces	89
Financing	90
Supply	95
Chapter 3 Standards, Principles, and Regulations	101
Healthy People	101
Standards for Immunization Practices	101
Standards for Child and Adolescent Immunization Practices	101
Standards for Adult Immunization Practices	104
National Childhood Vaccine Injury Act	105
National Vaccine Injury Compensation Program (VICP)	105
Vaccine Adverse Event Reporting System (VAERS)	109
Vaccine Information Statements (VISs)	109

Public Readiness and Emergency Preparedness (PREP) Act	113
Occupational Safety and Health Administration (OSHA)	113
Mandates and Exceptions	119
Day Care Centers and Schools	119
Hospitals and Other Institutions	122
Chapter 4 Vaccine Practice	127
Handling, Storage, and Transport	127
Improving Delivery	140
Reminder, Recall, and Tracking Systems	141
Missed Opportunities	141
Medical Home and Immunization Neighborhood	141
Immunization During the COVID-19 Pandemic	143
Standing Orders	143
School-Located Vaccination (SLV)	143
Immunization Information Systems	146
Immunization Coalitions	147
Other Strategies	147
Screening	147
Administration	148
General Issues	148
Routes	149
Anxiety, Pain, and Fever	158
Emergencies	158
Syncope	159
Anaphylaxis	159
Coding, Billing, and Costs	160
Chapter 5 General Recommendations	167
Ten Simple Rules by Which to Vaccinate	167
Rule 1—Any Vaccines Can Be Given on The Same Day	167
Rule 2—Live Vaccines Not Given on the Same Day Should Be Separated by ≥ 28 Days	168
Rule 3—Different Non-live Vaccines May Be Given at Any Time With Respect to Each Other	168
Rule 4—Doses of the Same Vaccine Must Be Separated by Minimum Intervals	169
Rule 5—All Vaccines Have a Minimum Age	176
Rule 6—Do Not Restart a Vaccine Series if the Recommended Dosing Interval Is Exceeded	176
Rule 7—Similar Vaccines Made by Different Manufacturers Are Generally Interchangeable	177
Rule 8—There Is No Harm in Vaccinating a Person Who Has Already Had the Disease or the Vaccine	178
Rule 9—Defer MMR and VAR After Administration of Antibody-Containing Blood Products	178
Rule 10—Live Vaccines May Be Used in Households With Pregnant and Immunocompromised Persons	179
Administration Errors	183
Testing for Immunity	189
Contraindications and Precautions	189
Chapter 6 Vaccination in Special Circumstances	195
General Considerations	195
Impaired Immunity	195

Other Medical Conditions	197
Additional Situations.....	198
Coverage Rates in Special Populations.....	199
Immune Deficiency States	199
HIV Infection	199
B-cell (Humoral) Deficiencies	203
T-cell (Combined Humoral and Cell-Mediated) Deficiencies.....	210
Phagocyte Disorders.....	211
Complement Deficiencies and Inhibitor Use.....	211
Anatomic and Functional Asplenia.....	211
Steroids	212
Disease-Modifying Antirheumatic Drugs and Biologic Response Modifiers.....	213
Chemotherapy	213
Solid Organ Transplantation.....	214
Hematopoietic Stem-Cell Transplantation.....	216
Other Predisposing Conditions.....	217
Pregnancy, Postpartum, and Breast-Feeding.....	217
Newborns.....	226
Preterm and Low Birth Weight Infants.....	227
Inborn Errors of Metabolism.....	227
Adults ≥65 Years of Age.....	228
Health Care Personnel.....	229
International Adoptees, Refugees, and Immigrants	233
Travel	234
Miscellaneous Special Situations.....	241
Chapter 7 Addressing Concerns About Vaccines	247
Communicating Risks and Benefits	248
Human Nature.....	248
Risk vs Benefit.....	250
Communication Strategies	251
Teaching Vaccine Confidence.....	258
Vaccine Refusal.....	259
Antivaccinationism	261
The Costs of Public Concern	262
General Issues.....	266
Necessity of Vaccines	266
Natural vs Vaccine-Induced Immunity	268
Immune Overload and Alternative Schedules.....	268
Adjuvants.....	272
Additives	273
Adventitious Agents	273
Nonspecific Negative Effects	275
Fetal Tissue.....	276
Allergy and Autoimmune Disease	277
Hygiene Hypothesis	277
Asthma.....	277
Allergies	277
Type 1 Diabetes (T1D)	278
Celiac Disease	278
Other Autoimmune Diseases.....	278
Autism.....	279
Neurological Conditions.....	281

Encephalopathy.....	281
Guillain-Barré Syndrome.....	282
Multiple Sclerosis, Transverse Myelitis, and Acute Disseminated Encephalomyelitis.....	284
Bell's Palsy.....	286
Narcolepsy	286
Febrile Seizures.....	287
Miscellaneous Concerns.....	288
Sudden Infant Death Syndrome.....	288
Kawasaki Disease.....	289
Intussusception	289
Immune Thrombocytopenia.....	290
Miscarriage, Birth Defects, and Infertility.....	290
Chronic Fatigue	292
Clustered Anxiety-related Adverse Events	292
Chapter 8 Routine Schedules.....	301

Section B: Diseases and Vaccines

Chapters 9 through 31 have the following subheadings:

The Pathogen
Clinical Features
Epidemiology and Transmission
Immunization Program
Vaccines
Immunogenicity, Efficacy, Effectiveness, and/or Impact
Safety
Recommendations

Chapter 9 Adenovirus.....	317
Chapter 10 Anthrax.....	323
Chapter 11 COVID-19.....	329
Chapter 12 Dengue	359
Chapter 13 Diphtheria, Tetanus, and Pertussis	367
Chapter 14 Ebola.....	387
Chapter 15 Haemophilus influenzae type b.....	395
Chapter 16 Hepatitis A.....	401
Chapter 17 Hepatitis B.....	411
Chapter 18 Human Papillomavirus	431
Chapter 19 Influenza.....	447
Chapter 20 Japanese Encephalitis.....	469
Chapter 21 Measles, Mumps, and Rubella	475
Chapter 22 Neisseria meningitidis	489
Chapter 23 Polio.....	507
Chapter 24 Rabies	513
Chapter 25 Rotavirus	527
Chapter 26 Smallpox.....	537
Chapter 27 Streptococcus pneumoniae.....	549
Chapter 28 Typhoid Fever.....	559
Chapter 29 Varicella	567
Chapter 30 Yellow Fever	579
Chapter 31 Zoster.....	587
Chapter 32 Combination Vaccines.....	595
Chapter 33 Appendix	609
